1. 6.14(A) compare the features and costs of a checking account and a debit card offered by different local finan ...

Josie is deciding, which debit card is a better deal for her based on fees charged for using ATM, a machine located in and around local businesses that allows bank customers to withdraw money. In which situation would Josie pay the least in ATM fees?

Answer:

- a. Bank A charges \$2 for every ATM transaction.
- b. Bank B charges 2% for each transaction, and Josie withdraws \$200 just once.
- ☒ c. Bank C charges 1% for each transaction and Josie withdraws \$100 just once.
- d. Bank D charges \$3 for every transaction.

Report an Error Choose Me

2. 6.12(C) summarize numeric data with numerical summaries, including the mean and median

The list below shows Stacy's test grades from the previous semester.

88, 74, 92, 63, 85, 76

What is the range of her test scores?
